

AFONSO CABOZ

Full-Stack Solutions Architect

afonso.caboz@gmail.com | linkedin.com/in/afonsocaboz | github.com/CodeZobac | codezobac.com | Warsaw, Poland

PHILOSOPHY

**"Code is a liability.
A solution is an asset."**

My guiding principle is to write the least amount of code necessary to create the most value.

TECH STACK

Frontend

Next.js React TypeScript

Tailwind Vue.js

Backend

Python Rust FastAPI

Node.js PostgreSQL

MongoDB

DevOps & Cloud

Docker Terraform AWS

Kubernetes

CI/CD

EDUCATION

Information Systems Programming

ETIC Algarve

2025 • Final grade: 18/20

Full-stack solutions architect with a keen eye for detail and a focus on solving business problems through technology. My approach is language-agnostic and solution-centered, with proven experience building and deploying scalable applications, from **Infrastructure as Code (IaC)** to the final user experience.

Currently completing an **ERASMUS+ professional internship** in Warsaw, applying my end-to-end product-building mindset in a dynamic, international environment.

Selected Projects

Gyst **AI-NATIVE KNOWLEDGE PLATFORM**

- Architected an **agentic system with CrewAI** for intelligent document analysis.
- Engineered a **RAG pipeline** for accurate conversational search.
- Built a robust **FastAPI** backend and reactive **Next.js** frontend.

NEXT.JS

FASTAPI

CREWAI

RAG

POSTGRESQL

ETIC Resource Hub **RESOURCE MANAGEMENT**

- Solutions Architect & Developer:** Delivered a fully functional MVP in under two weeks.
- Designed the entire system from **PostgreSQL** schema to **Next.js** frontend.
- Prioritized a modern rebuild over legacy refactoring for long-term scalability.

NEXT.JS

SUPABASE

TERRAFORM

DOCKER

In Sintonia **AYURVEDIC DIET PLATFORM WITH AGENTIC REAL-TIME CHAT**

- Developed an **agentic Rust backend** leveraging ZeroClaw for AI orchestration.
- Built high-performance APIs with **Axum + Utopia** and real-time chat via **WebSockets**.

RUST

AXUM

ZEROCRAW

WEBSOCKETS

Cyber Compass **EDTECH PLATFORM**

- Created a branching scenario system for ethical simulations.
- Implemented analytics to track user decision-making patterns.

REACT

FASTAPI

MONGODB

DOCKER

better.finder **DESKTOP SEARCH LAUNCHER**

- Built a system-wide **Rust + Tauri** desktop app with instant file search via Everything SDK.
- Integrated app launching, clipboard history, browser bookmarks, calculator, and web search fallback.

Professional Experience

Full-Stack Developer — ERASMUS+ Professional Internship

Feb 2026 – May 2026

Vivadrive, Warsaw, Poland

- Full-Stack Development:** Contributed to FleetFlow, an AI-powered fleet management application, delivering features across the entire stack.
- Ownership & Impact:** Took end-to-end ownership of critical features, from research, design, planning to implementation. Worked side by side with the company tech lead impacting the product's success.
- AI Integration:** Developed and integrated AI components using Django, enhancing the platform's intelligent capabilities.
- LLM Ops & Observability:** Implemented a 4-layer observability architecture in LangChain, ensuring reliability and traceability of AI-driven operations.

Full-stack Developer — Professional Internship

Jun 2025 – Sep 2025

ETIC Algarve, Faro, Portugal • pedidodemeios.eticalgarve.com

- Platform Development:** Single-handedly designed, built, and deployed the ETIC Resource Hub — a centralized resource management platform still in active use by the institution.
- Stakeholder Engagement:** Pitched the project to the director and presented it to all professionals, gathering feedback and iterating on the solution to ensure it met the institution's needs.
- Product-Centric Approach:** Focused on delivering a user-friendly, scalable solution that met the specific needs of ETIC, rather than quick fixes or legacy refactoring.
- End-to-End Ownership:** Managed the full lifecycle from database schema design and backend API to the frontend interface, delivering a production-ready MVP in under two weeks.

Seeking to connect with a visionary team where I can contribute to and learn from a world-class engineering culture.
